

# Minsung Cho

[minsung@ccs.neu.edu](mailto:minsung@ccs.neu.edu) | [cho.minsung.pl](http://cho.minsung.pl)

## EDUCATION

---

**Northeastern University**, Ph.D. Computer Science 2022–Present

Advisor: Steven Holtzen

**Carnegie Mellon University**, B.S. Mathematics and Philosophy (Logic track) 2018–2022

Thesis: *Cops and Robbers in Lean*

Advisor: Jeremy Avigad

## EXPERIENCE

---

**NSF REU Researcher**, University of Tennessee at Chattanooga 2021

- Classified the Krein–von Neumann extension on regular even–order quasi–differential operators
- Published in *Opuscula Mathematica*

**Researcher in Combinatorics**, Carnegie Mellon University 2020

- Generalized the cop-win property to 1-connected infinite graphs
- Research featured on 2021 CMU Mathematics newsletter
- Grant proposal featured by CMU Undergraduate Research for exceptional writing

## PUBLICATIONS

---

*The Krein-von Neumann extension of a regular even order quasi-differential operator.* M. Cho, S. Hoisington, B. Udall, R. Nichols. *Opuscula Mathematica*. 41.6 (2021): 805-841.<sup>1</sup>

## PROJECTS

---

**daPPL: Efficient Decision–Theoretic Probabilistic Programming** Rust

We introduce a new language unifying knowledge compilation and semantic approaches to maximum expected utility to reason about decisions in a safe and efficient manner. To be presented at PLDI SRC 2023.

**The Software Evolution of Theorem Provers** Jupyter Notebook, Typescript

We investigate the history of different theorem provers through a software engineering lens to visualize the development of the modern theorem proving community.

**Cops and Robbers in Lean** Lean 3

We formalized the game of Cops and Robbers on a graph and associated theorems such as *a complete graph is always cop-win* and *every cop-win graph has a corner*.

## AWARDS

---

PLMW@PLDI 2023 scholarship recipient.

University and College honors (equiv. magna cum laude) from Carnegie Mellon.

---

<sup>1</sup>In math, author order is alphabetical. All authors contributed equally.

## SKILLS

---

Fluent in Korean and English.

Experience in functional programming (Lean, Coq, Haskell, ML dialects), Python, Rust, LaTeX.

5 semesters of TA experience in mathematics and logic, including one graduate course.
